

# GDPR

## Vendor Management Solutions

**Businesses face significant fines for non-compliance with the European Union’s General Data Protection Regulation (the “GDPR”), which imposes new and unprecedented levels of information security and data privacy requirements.**

Do you work with third-party vendors that provide services involving the processing of personal data regulated by the GDPR? Are you tasked with managing these contracts and ensuring GDPR compliance? Legility can help.

Let us review your vendor agreements to identify and incorporate GDPR provision, or help you distribute, negotiate and execute new GDPR-compliant Data Agreements to replace existing data privacy provisions.

No matter the strategy to ensure GDPR compliance, Legility can partner with in-house and external legal advisors to assess potential exposure, create workflows to complete necessary remediation, and ensure that all contracts and agreements conform with GDPR requirements:

- We stage contract amendments and new Data Agreements for distribution to hundreds of vendors.
- We establish workflows and design playbooks. Our Subject Matter Experts will work with you to outline preauthorized fallback positions for contract amendments and new Data Agreements, along with must-have provisions to use in reviewing alternative vendor-supplied agreements.
- We manage and conduct the distribution, negotiation and execution of contract amendments and new Data Agreements.
- We provide expert Project Management. Utilizing real-time dashboards, our Project Managers track the status of each contract amendment and new Data Agreement. They will constantly monitor project progress, enabling them to make efficient staffing decisions, stay on budget and meet the GDPR deadline.

Let's change the business of legal together.
